PRESS RELEASE

Net Zero - Reality Check: An Unapologetic Exposé on the Realities of Achieving Climate Goals.

Frank, a fiercely independent editor of the "Futurology Chronicle" and an accomplished author in science and technology, brings forth his latest hard-hitting work "Net Zero - Reality Check."

This book is the follow-up to his January 2023 release, "Earth Polycrisis - Reality Check." It updates readers on the climate disruption events and climate policy developments since then, offering a deeper exploration of these topics.

His 9th book, a 321-page manifesto, cuts through the noise of climate change discourse, offering 142 chapters of unfiltered truth. Frank's direct style blends future-focused realism, solid scientific facts, and a provocative twist to engage readers.

Net Zero - Reality Check isn't just a book; it's a call to action. Diving deep into the complexities of climate science, free from the biases of commercial and academic interests.
